This document contains information that is confidential or proprietary to BloomNet (or its direct and indirect subsidiaries). By accepting this document you agree that (1) if there is any pre-existing contract containing disclosure and use restrictions between your company and BloomNet, you and your company will use this information in reliance on and subject to the terms of any such pre-existing contract; or (2) if there is no contractual relationship between you and your company and BloomNet, you and your company agree to protect this information and not to reproduce, disclose, or use the information in any way, except as may be required by law.

## New Self Service Route4me

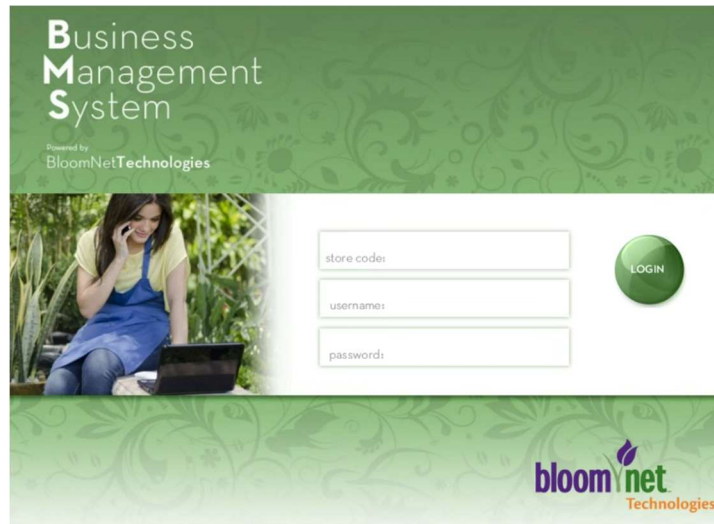

### Introduction

BMS POS and BMS LITE users can now utilize the “Route4Me Registration” page to self service their account.

This new page will allow the user to create their route4me account without the need to contact Tech Support Department. This will expedite the process for the user to start using Route4Me and allow for self-training as well.

### How to create a route4me account

Before attempting to create an account with Route4Me, the user will need to be logged as a manager in the BMS system:

Once logged in as a “Manager”, the user can hover over My Shop and then over Delivery Management in order to see the new option “Route4Me Registration”:

Once the user clicks on this new page, the Route4me Account Registration Page will come up:

**Route4Me Account Registration** [Return](#)

  
**Register New Account**

Email Address:

First Name:

Last Name:

Password:

Confirm Password:

[Create Account](#)

It is here that the user will need to fill out the required fields in order to create the new Route4Me account and synch it with BMS account. If the account was successful, the user will be presented with the following page:

**Route4Me Account Registration** [Return](#)

  
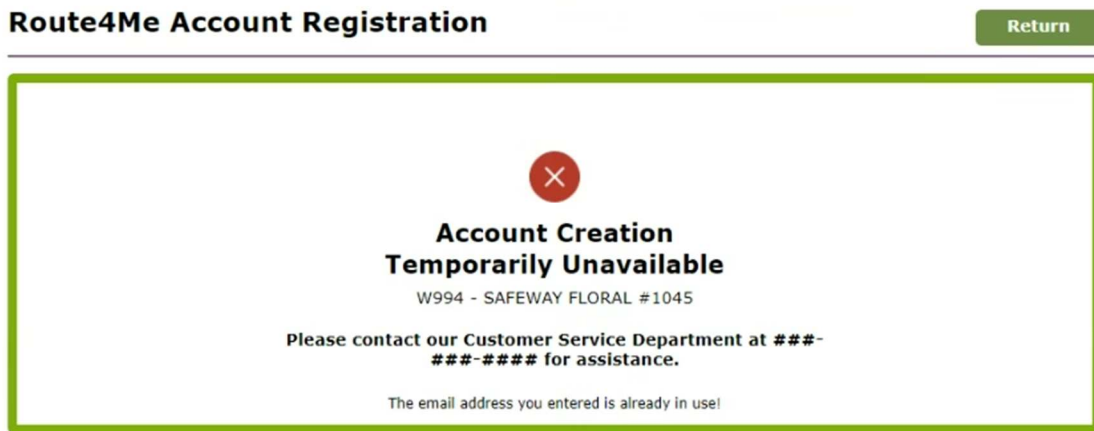

**Thank you!**  
Your new Route4Me Account has been created successfully  
and is linked to BMS!

[Download training pdf](#)

[Android training videos](#) [iPhone training videos](#)

This page will contain a link to our Route4Me Training video and a link for our Route4Me Training manual if they wish to print it.

In the event, that the email the user is using to create the Route4Me account is already in existence, the user will be presented with this page:

From here, the user can click on "Return" to try and use a new email address or can contact our Tech Support Department by calling 866-256-6663 or using the LiveChat option at the bottom of the screen.

# Bug Fixes

## **Order Details page was not receiving status updates.**

The field Delivery Provider Status was not receiving update status past the status of picked\_up. This was noticed on a Doordash order, however it may affect other DSPs as well. This release has ensured the functionality is fixed.

## **Designer productivity report throws an error.**

The designer productivity report was providing an error if an employee did not clock in while designing orders. This release has ensure the functionality is fixed.

## **Bloomnet orders not auto-printing when auto-accepted.**

When the account is set up to only auto print accepted orders, if bloomnet orders were set to auto accept the orders were not printing. This release has ensure the functionality is now working as expected. Now auto-accepted orders on BMS accounts with a set up to auto-print accepted orders will ensure Bloomnet orders print.

# Miscellaneous

- **Enable 3<sup>rd</sup> party delivery service while creation master route4me account.**
- **Add Webhook to self service route4me page.**
- **Set BMS to only use AWS for roadie Images.**
- **Fixed Null exception loading to environment URLs.**
- **Clean DoorDash Errors.**
- **Fixed delivery orders not moving to archive tables.**
- **Fixed validation error entities.**
